Education

- **BNM Institute of Technology**　　　　　　　　　　　　　　　　　　　　　Bangalore
  Bachelor of Engineering in Information Science; GPA: 7.41/10.0　　　　　　*2019*
- **Pes Pu College**　　　　　　　　　　　　　　　　　　　　　　　　　　　Bangalore
  12th standard; Percentage: 78%　　　　　　　　　　　　　　　　　　*2015*
- **The JHS School**　　　　　　　　　　　　　　　　　　　　　　　　　　　Bangalore
  10th standard; Percentage: 76.8%　　　　　　　　　　　　　　　　　*2013*

Skills

- Programming language: Java, Dbms, Python.
- Framework and Api: Travis Ci, Jenkins, Jupyter Notebook, git, MySQL, OracleSql.
- Domain Expertise: Oracle Argus, Data science and visualization, Big Data Analytics, Database Design, Artificial Intelligence.

Certification

- **Udacity Intel Edge AI scholarship**　　　　　　　　　　　　　　　Dec 2019 - Present
  - o　Working on Open vino toolkit from Intel.
  - o　Working on people counter app at the edge.
  - o　Working on pre trained models on human pose estimation, vehicle colour - type and text detection.

Projects

- **Vehicle Number Plate Recognition**　　　　　　　　　　　　　Sept. 2018 to Apr 2019
Extracting number plate in vehicles using support vector machines. The real time datasets(videos) is taken built the software for identification for more than one vehicle number plate in frames. Tools used python.
- **OFD**　　　　　　　　　　　　　　　　　　　　　　　　　　Sept. 2018 to Nov 2018
The customer can login to website place the order of their choice and data is stored in back end. Tools used for front end is html, css, Angular js, php and back end is xampp, sublime text.

- **Doctor Records**   Feb. 2018 to May 2018

The doctor access to the patient, record is stored in text file where the doctor can access it. We use B+ Tree technique to store the id and that stores the key value in tree structure. Tools used Java, text file(back end)

- **Online Food Delivery**   Sept. 2017 to Nov. 2017

The customer can login to the web by front end and place the order online of their choice and get delivery to door step and the data is stored in back end. Tools used java(Netbeans), oracle 12g.

- **Other Projects**: Developed my personal blog, Automation Testing, Facial Emotion Recognition.
Refer my Github Repository

Activities

- Completed a project "**IOT ON Wireless Sensor Network**" in the WINTER COMPETITION 2017.
- Completed a project "**Intelligent Transport System**" in the SUMMER COMPETITION 2016.
